EDUCATION

Diploma in Computer Science

Cairo University	**2020 - 2022**

B.S.E. in Education

Ain Shams University	**2015 - 2020**

Graduation Project:

Your Doctor: A doctor appointment system is an online tool that enables patients to book appointments with their doctors and manage their appointments. Doctors and clinics can use the system to manage their schedules and patients.

- o As the team lead, successfully guided the design and development. Effectively resolved conflicts among team members, ensured cohesive planning, and maintained project focus, resulting in timely delivery without losing sight of the project's goals and objectives.
- o Took full ownership of the front-end development, utilizing Angular, Bootstrap,Material, and Sass to create a seamless user interface.

Frontend tools and Technologies: Html&Scss , Bootstrab ,JS , Angular

---

EXPERIENCE

IKEA KSA- Front-End Developer (ANGULAR) Internship

Oct 2022 – Jun 2030

- o **Responsibilities**: I used my skills in HTML, CSS, TypeScript, and Angular to develop multiple UI components and services that eased API consumption.
- o **Agile Environment:** I worked in an Agile environment and collaborated closely with the backend team to ensure seamless integration of the front end with the API.
- o **Learning:** This internship allowed me to learn industry best practices in web application development and strengthen my teamwork, communication, and technical skills.

Overall, this internship was a valuable experience that helped me develop my technical ability and prepare me for future opportunities in Frontend Development.

Future Internet Dubie –Front-End Developer
